WEB & AI AUTOMATION DEVELOPER

Cairo, Egypt | Open to Remote | adlyehabdev@gmail.com | +20 106 352 9309 | linkedin.com/in/adly-ehab-dev

PROFESSIONAL SUMMARY

Web and AI automation developer based in Cairo, Egypt. I build websites, online stores and web systems, and connect them to AI and automation. I have shipped real products for clients and businesses, including a CRM that handles 500+ leads a day, desktop automation tools for Facebook, X and Telegram, and several Arabic-first products with full right-to-left support.

CORE SKILLS

Front-end	React JavaScript HTML CSS Tailwind Responsive design
Web & E-commerce	PHP MySQL WordPress / stores REST APIs
Python & Desktop	Python Flask Playwright SQLite CustomTkinter Electron
AI & Automation	LLM APIs (Claude, Llama) AI agents Telegram bots Workflow automation
Tools	Git GitHub Docker Hostinger deployment AI-assisted development (Claude Code)

SELECTED PROJECTS

LEADORA CRM	CRM for Arabic sales teams: seven-stage sales pipeline, multi-channel lead intake and role-based executive dashboards (PHP, MySQL, JavaScript).
Volume 4T	Company website with an integrated CRM tracking 500+ leads a day, plus an LLM assistant for the CEO.
FBAUTO	Windows desktop app that pulls leads from Facebook posts and groups, scores them by buying intent and exports them to Excel.
X Engine	Desktop dashboard for X outreach: scrapes communities and keyword searches, classifies posts with rules or AI, sends DMs and schedules posts (Python, Flask, Playwright).
Telegram Members Manager	Python desktop app for managing Telegram sessions, collecting group members, adding them to groups, and messaging with a local inbox.
SCO4M & Wahm	Arabic-first platforms: a social media services store with automatic order dispatch and a reseller API, and a digital subscriptions store.
